

OURREPUBLIC.US

EXACTLY WHAT COUNTRY DO YOU THINK YOU LIVE IN?

We are a nation increasingly populated by people that oppose our Constitution and limited government. Additionally, many are being taught to despise the very principles that created the Constitution as well as the people that today still hold those principles.

This nation exists only for those that desire to be free and are capable of living moral enough lives to be free. All else is a threat to our republican form of government and our way of life.

To preserve our republic, we must take inventory of our public servants and document those that will honor their oath and those that will not. Humbly and with all due respect, we seek to engage you in this process. Liberty is our only goal.

Maintaining Our Republic

1. We are entitled to a federal government limited by the U.S. Constitution, as well as to law enforcement and state and local governments honoring their oaths to protect us when it is not.
2. Socialism, at the federal or state and local levels, is not freedom.
3. We are Americans, and if ever a people was entitled to be free from Socialism, to disobey, defund, seek out and destroy it, it would be us.
4. We have Republicans and Democrats at all levels that are willfully and criminally ignoring the U.S. Constitution.
5. We are in desperate need of some level of government to stop cooperating with politicians that are breaking the law.
6. The responsibility to maintain our republic is ours and yours.
7. An honest discussion of the U.S. Constitution is needed in order to understand the degree to which the law is being broken and our rights violated.
8. A discussion is needed concerning the principles that created the freest nation the world has ever known so that all will know whose republic this is and whose it is not.
9. To accomplish our goal of making Lancaster County a place where Americans are again protected by the Constitution, we are simply requesting that the people that have willingly sworn an oath to obey and defend the Constitution do so.
